

A GUIDE TO YOUR PET'S FOOD ELIMINATION TRIAL

Please feed the recommended veterinary diet for 8-12 weeks or as directed by your veterinarian. See below tips and tricks for best results

Wash your pet's bowl and measuring cup with dishwashing liquid after every meal and rinse thoroughly.

Keep a separate bowl and measuring cup for each pet's food (if you have multiple pets). If this is not practical, feed one pet before preparing any other pet's food.

Do NOT leave your pet's food down between meals to prevent snacking from each other's bowls.

Ensure family members, neighbors, and friends who may interact with your pet understand the risk of feeding snacks to your pet.

If your pet loves snacks, keep a small amount of the recommended diet food in a clean and sealed container to use as treats.

Keep the bag of food sealed between meals and store it in a clean, dry place. For added protection, place the bag inside a sealed container but do NOT pour the food out of the bag into the container.

Wash your hands before handling your pet's food.

DO NOT GIVE:

- Treats
- Rawhides
- Flavored Medications or Supplements
- Flavored Toothpastes
- Flavored Plastic Toys
- Pigs Ears
- Cow hooves
- Processed Chews
